VELI Projects One Million Registered Users of Its School Safety Management System in 2008

FAIRFIELD, NJ--(Marketwire - February 28, 2008) - Virtual Ed Link, Inc. (VELI) (PINKSHEETS: **VRED**), licensed marketer and provider of the School Safety Management System (SSMS) acknowledges that its partnership with Atlantic Energy Companies (www.atlanticenergy.net) and agreement with the Clements Group LC (www.clmgrou.com) to jointly sell the VELI SSMS to schools, community colleges, technical institutes, and universities around the country is receiving overwhelmingly positive response.

Thus far, sales contacts have occurred in over twenty five states to over six hundred community colleges and technical institutes along with hundreds of public and parochial grade school districts. Furthermore, the recent inclusion of VELI in the BOCES CoSer fund in New York State continues to cause widespread activity from NY school districts looking to implement the VELI solution through the assistance of government funding.

VELI is on course to sign contracts in the near term with several new school districts and colleges that will result in approximately 250,000 registered users before June 2008. Based on the present rate of growth, the VELI leadership conservatively estimates one million registered users will be on the SSMS platform by year-end 2008.

CEO John Bay stated: "In addition to the licensing and customization fees that VELI receives for implementing our solution in each school, VELI receives \$4.95 per registered user annually. With all indicators pointing toward demand for our product increasing, coupled with an aggressive campaign to make schools aware of the solution we provide, we anticipate 2008 to be a banner year for VELI."

About Virtual Ed Link:

Virtual Ed Link, Inc. responds to the growing need from school campuses (K-12 and higher education institutions)

to collect, access, share and disseminate vital information within school districts. The School Safety Management System (SSMS), through VELI, is web-based and can be accessed anywhere. SSMS can be customized for the particular school or college in which it is being implemented. Basic guidelines, rules and procedures, and general notifications are embedded as defaults, or the school can install its own.

Virtual Ed Link, Inc. is a subsidiary of Viyya Technologies, Inc. (PINKSHEETS: **VYON**). The VELI School Safety Management System is powered by The Viyya Core Technology.

Legal Notice Regarding Forward-Looking Statements

"Forward-looking statements" as defined in the Private Securities Litigation Reform Act of 1995 may be included in this news release. These statements relate to future events or our future financial performance; they are only predictions and may differ materially from actual future results or events. VIYYA™ disclaims any intention or obligation to revise any forward-looking statements whether as a result of new information, future developments or otherwise. Important risk factors -- including but not limited to risks associated with changes in general economic/business conditions (including in the IT and financial information industries), actions of our competitors, the extent to which we are able to develop new services and markets for our services, the time and expense involved in such development activities, the level of demand and market acceptance of our services and changes in our business strategies -- could cause actual results to differ from those contained in forward-looking statements.
